- Table 10 - Water Use, Acres Irrigated, and Average Application Rate by Type of Irrigation System by County, Kansas, 2012

INTRODUCTION

The data shown in this publication were prepared using information from Irrigation Water Use Reports submitted to the Kansas Department of Agriculture, Division of Water Resources (DWR), for the 2008 through 2012 calendar years. Annual Water Use Reports are required of all permitted water users as a condition of K.S.A. 82a-732 of the Water Appropriations Act. Each year, Irrigation Water Use Reports are reviewed by DWR to ensure that the information provided is as complete and accurate as possible. Corrections to the reported information may be made through follow-up letters and phone calls. DWR expresses their appreciation to all irrigation water users for completing these annual reports and participating in the follow-up process.

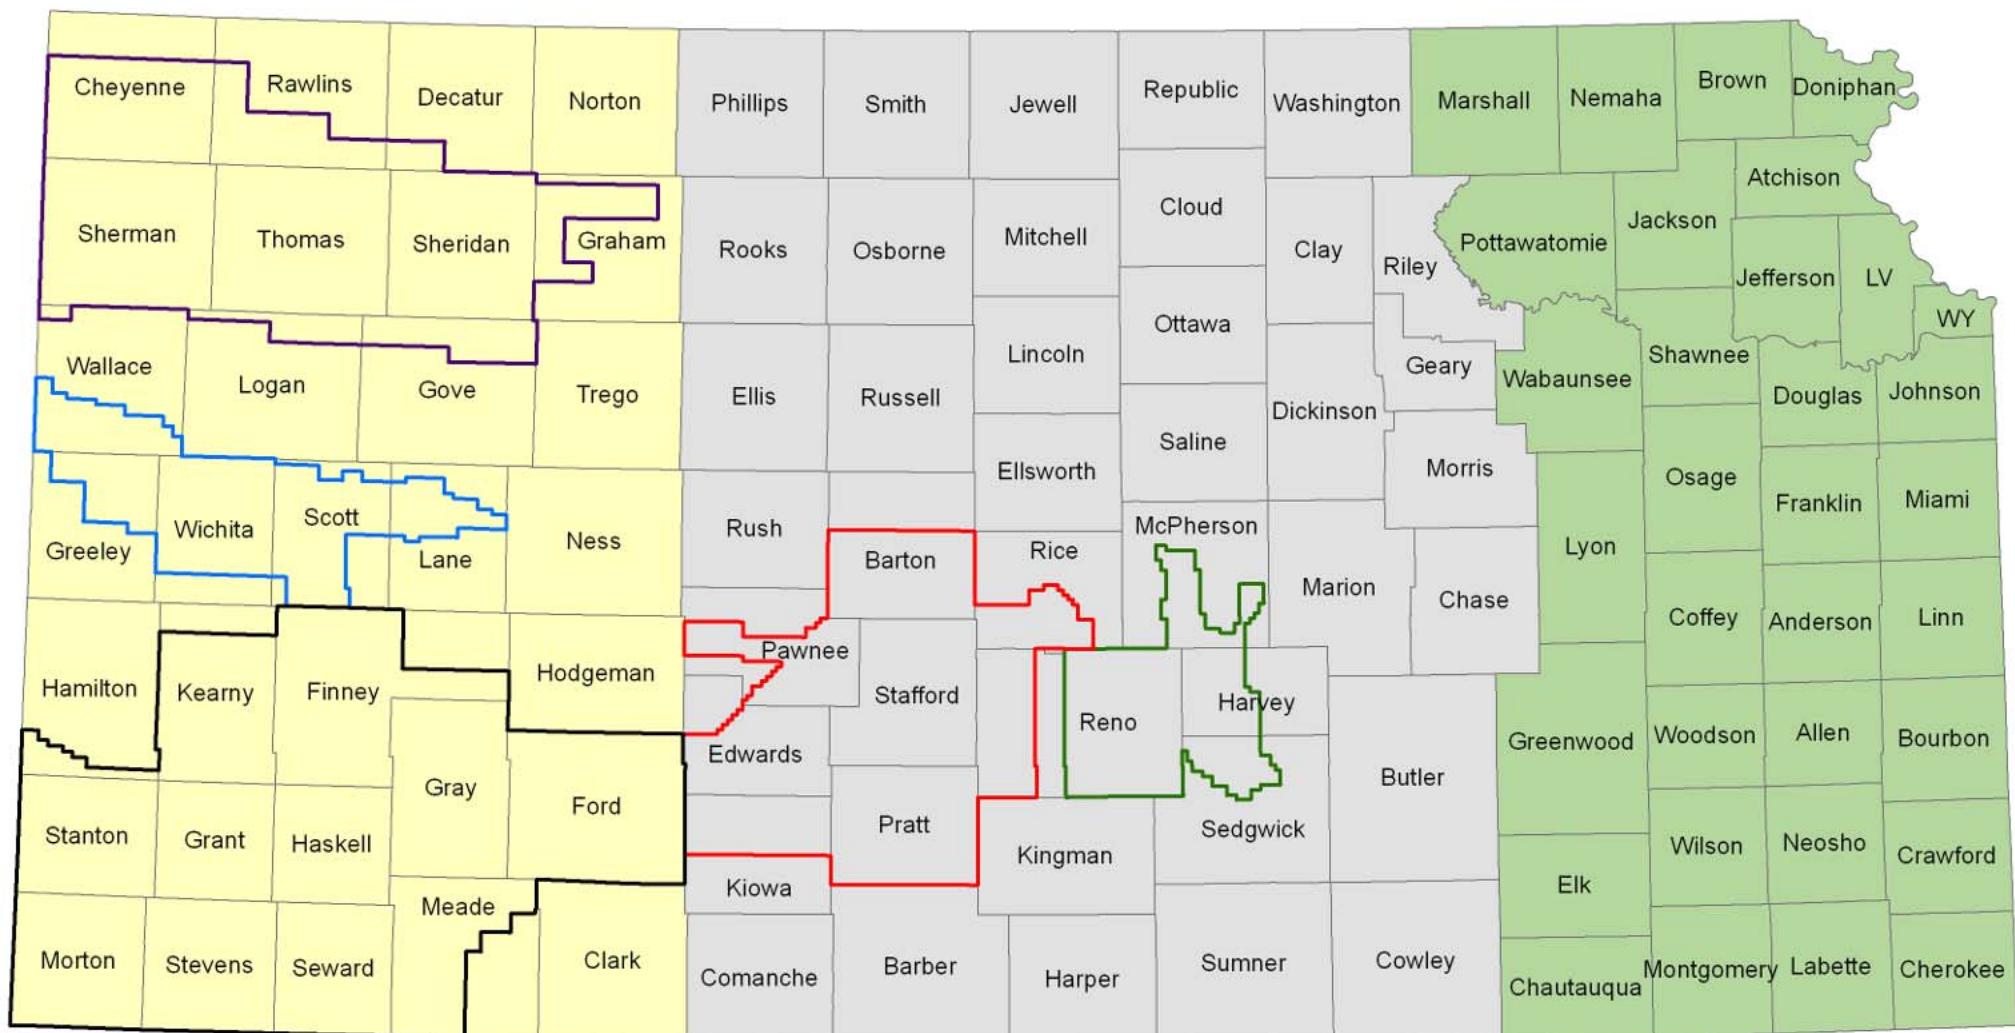

Irrigation is most prevalent in western Kansas where average annual rainfall is less than 20 inches and sufficient groundwater can be pumped to compensate for this lack of moisture. Irrigation water use decreases from western to eastern Kansas, where precipitation is greater and significant aquifers are not present. For many years, the maximum allowable quantities of water allowed for irrigation were 2.0 acre-feet per acre in western Kansas (from the Kansas/Colorado border to the Range 20 West / Range 21 West line), 1.5 acre-feet per acre in central Kansas (from the Range 20 West / Range 21 West line to the Range 5 East / Range 6 East line), and 1.0 acre-feet per acre in eastern Kansas (from the Range 5 East / Range 6 East line to the Kansas / Missouri border). As a result of revised regulations, appropriations of water for irrigation after Sept. 22, 2000 have been based on county-level net irrigation requirements for corn, as determined by the National Resources Conservation Service (NRCS). These county values are shown on p. 68 of the Kansas Water Appropriation Act Rules and Regulations, available at https://agriculture.ks.gov/docs/default-source/dwr-water-appropriation-documents/kwaa_rules_regs57c3ada8d515.pdf?sfvrsn=4

Irrigation water use data in this report are shown by county and by region. The three major regions used for analysis are similar to those originally used for allocation of reasonable quantities for irrigation, because those guidelines were in effect when the majority of irrigation water rights were issued. The division between central and eastern Kansas was adjusted to coincide with county boundaries (see figure 1). The western and central regions are further divided to distinguish the 5 Groundwater Management Districts from the remainder of each region.

Several factors should be considered when interpreting the irrigation water use data presented in this report, or when comparing these data to other sources of irrigation information:

- Quantities of water diverted and acres irrigated are as reported by irrigators, with possible corrections after review by DWR staff. Although the law requires accurate reporting, it is impossible to verify every measurement.
- This report compares irrigation water use with irrigated acres to produce application rates by county and by regional location. Water diverted under ditch irrigation water rights in southwest Kansas and by irrigation districts in north-central Kansas cannot be directly associated with irrigated acres in the same county or region of withdrawal, and for this reason these quantities of surface water are not included in the tables of this report.
- While the majority of irrigated lands in Kansas are in crops, some counties may have irrigation water use for golf courses, nurseries, and recreational areas.
- Historic water use data maintained by DWR are subject to revision at any time as better information becomes available. Revisions to past years' data may result in very small differences from previously published county, regional, and state totals. The data shown in this report are current as of September, 2014.

Eastern Kansas											
All Eastern Kansas	1,474	55,491	80,150	3,553	6.4%	0.30	0.21	0.34	0.58	0.69	0.42
State Total	30,836	4,007,608	3,033,531	108,986	2.7%	1.10	0.99	1.08	1.36	1.32	1.17

^{a/} Total number of active points of diversion includes those that were not used in 2012.

^{b/} Water use does not include approximately 137,660 acre-feet of surface water withdrawn in 2012 under ditch irrigation water rights in southwest Kansas and by irrigation districts in north-central Kansas. These amounts cannot be associated with irrigated acres in specific counties and regional locations to develop an acre-foot per acre average, so they are not included in any of the tables.

^{c/} Regional standards used for comparison are those that apply to the majority of appropriations for irrigation water use (see figure 1).

^{a/} Water use and acres irrigated from combined points of diversion are included with either metered or not metered points of diversion.

^{b/} Percent metered is the number of metered pd's divided by the total number of pd's excluding combined.

^{a/} Figures may not add to totals due to independent rounding. The estimated number of acres of each type of crop was determined by adding single-crop acreages to prorated multiple and double-crop acreages. Acres reported as combinations of multiple specified crops were divided equally among the number of crops indicated. Unspecified crop acres were assigned to major crop and other types in the proportion that these crops were specified on single-crop and specified multiple-crop acres. Double-crop acres were assigned to 20% corn, 15% grain sorghum, 20% soybeans, 40% wheat, and 5% other.
